² Operating temperature can be extended up to +65°C with reduced current and power ratings.

³ iPOS360x can be operated in vacuum (no altitude restriction), but at altitudes over 2,500m, current and power rating are reduced due to thermal dissipation efficiency.

⁴ It is recommended to mount the iPOS3604 BX-CAN on a metallic support using the provided mounting holes, for better reliability and reduced de-rating due to heat dissipation

[†] Stresses beyond values listed under "absolute maximum ratings" may cause permanent damage to the device. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

¹ For many applications, an 120Ω termination resistor should be connected across SIN+ to SIN-, and ³ V_{OUT} – the output voltage, V_{MOT} – the motor supply voltage across COS+ to COS-. Please consult the feedback device datasheet for confirmation.
