[1] If +V$_{LOG}$ (J4 pin7) is not connected, the digital outputs and inputs will not be operational.
[2] Operating temperature can be extended up to **+65ºC** with reduced current and power ratings.

[3] iPOS360x can be operated in vacuum (no altitude restriction), but at altitudes over 2,500m, current and power rating are reduced due to thermal dissipation efficiency.
[4] It is recommended to mount the iPOS3604 HX-CAN on a metallic support using the provided mounting holes, for better reliability and reduced de-rating due to heat dissipation
